

# NEW PRODUCT LAUNCH

## HEAT – CEIL

### New Lightweight Insulation Panel for suspended ceilings

Introducing a light weight self supporting insulation panel made of a high grade, polystyrene core with aluminium foil both sides. This product reflects 97% of radiant heat and is environmentally friendly.

#### Advantages of these lightweight high R value panels:

- ✓ **CLEAN** - No special clothing or mask needed to install.
- ✓ **EASILY FITS** – above existing ceiling tiles
- ✓ **EASY TO INSTALL** - Can be trimmed with utility knife.
- ✓ **CUT TO SIZE** - Ready to fit all standard grids (594 mm x 1194 mm)
- ✓ **WATER RESISTANT** - Will not trap moisture laden air.
- ✓ **NO SAGGING** - Will not settle over time, reducing efficiency.
- ✓ **DELIVERY** - Light and compact to transport.
- ✓ **AIR CONDITIONING SYSTEMS** - Will run more efficiently, reducing running costs.
- ✓ **RE-USABLE** - With refurbishment of ceiling panels, even after 15 years just vacuum off dust and use again.
- ✓ **WATER** - Drips from air conditioning systems can gather on panel and evaporate, leaving face panel untouched.

#### Thickness & thermal ratings available:

10 mm =R 1.8

15 mm = R 2.2

20 mm =R 2.6

25 mm = R 3.0
